### DOREL JUVENILE GROUP CLARIFIES LABEL

**Montreal, June 27, 2002?** The Dorel Juvenile Group (Canada) with the co-operation of Transport Canada wishes to advise the public of a correction to a label on a Cosco Convertible Carseat. This is not a safety issue. The existing label understates the height limitation of the child when the carseat is used in the rear facing position. The correct label states rear facing can accommodate a child to a maximum height of 35 inches which allows the carseat to be used safely over a longer period of time.

The 67,000 carseats were produced from July 2000 onwards and consist of the following model names, Eddie Bauer Touriva, the Forerunner and model numbers: 02-C04; 02-C05; 02-C58; 02-C70; 02-C75; 02-C10; 02-C24; 02-C35; 02-C71; 02-C87; 02-C90. The model number is located on a label on the side of the carseat.

Consumers should contact the Cosco Customer Service hotline at 1-800-536-4070 to order free replacement labels for both the restraint system and the instruction booklet.
